## overview

The central board of Raindrops is slightly tilted and **attached to the box**, simulating a window on a rainy day. Players try to identify a **descending path** of the same symbol, so they could slide down with their droplets (**never upwards!**). They collect the tiles through which their droplets slid and need to figure out how to place them on their individual boards to complete objectives. Before putting new tiles on the board, the magic happens! **They take the box and tilt it**, causing the remaining tiles to slide to fill in the gaps, just like rain!

## highlights

- Unusual theme
- Unique sliding feel
- Bejeweled appeal
- Language independent

## components

- 1 first player token
- 1 central board
- 4 player boards
- 30 objective cards
- 4 player droplet pieces
- 35 victory point tokens
- 80 2x1 tiles
- 40 1x1 tiles
