

rain drops

A family game with an incredible visual appeal.
Players connect raindrops on a unique tilted board!

bit.ly/play-raindrops

overview

The central board of Raindrops has a tray and is slightly tilted, simulating a window on a rainy day. Players try to identify a **descending path** of the same symbol, so they could slide down with their droplets (**never upwards!**). They collect the tiles where their droplets slide through and need to figure out how to place them on their individual boards to complete objectives.

Before putting new tiles on the board, the magic happens! They **tilt the board**, causing the remaining tiles to slide to fill in the gaps, just like rain!

highlights

- Table presence
- ◆ Unique sliding feel
- ⊕ Bejeweled appeal
- ✳ Language independent

components

1 first player token
1 central board
4 player boards
30 objective cards
4 player droplet pieces
35 victory point tokens
80 2x1 tiles
40 1x1 tiles
